

# LSS 105

## Lean Six Sigma Implementation

Using Lean Six Sigma To Enhance Business Results

### → Course Objectives

In this course, you will learn specific ways to eliminate overproduction, manual touches and other wasted work through the use of specific "Lean" techniques.

### → Key Benefits

- Learn and use Six Sigma tools to analyze data and control processes
- Apply combined Lean and Six Sigma techniques to attack specific problem areas

### → You Will Learn

- How to estimate the cost of specific activities to predict how improvements will affect a true ROI
- How to estimate cost versus benefit and prioritize Lean Six Sigma projects based on their potential cost savings
- How to use toll gates to manage Lean Six Sigma programs

### → Who Should Attend

- Managers, supervisors and employees responsible for quality improvement, cost reduction and customer satisfaction

### → Tuition: **\$525.00 per student**

- Travel expense is not included in tuition costs
